

An isometric line drawing of the Weiher LGB 6000 unit. The main rectangular box has a circular access panel on its left side and a cylindrical vent pipe protruding from the bottom front. A smaller rectangular base sits behind it, supporting a cylindrical draft hood. A label on the top right edge of the main box reads "Weiher LGB 6000". A dashed vertical line indicates the internal connection between the draft hood and the main unit's vent system.
